

PENNSYLVANIA AMPHIBIAN AND REPTILE SURVEY

A PROGRAM OF THE MID-ATLANTIC CENTER FOR HERPETOLOGY & CONSERVATION

THE PENNSYLVANIA AMPHIBIAN AND REPTILE SURVEY (PARS)

is a joint citizen science atlas project between the Mid-Atlantic Center for Herpetology and Conservation and the Pennsylvania Fish & Boat Commission, with additional funding from the Department of Conservation and Natural Resources, Wild Resource Conservation Fund.

AMPHIBIANS & REPTILES

(collectively called herps by some) are important species found in just about every Pennsylvania landscape. Very little information about Pennsylvania's herps has been collected through the years when compared to other groups of organisms. This is unfortunate as herps are important indicators of the health of our natural places and the very presence of certain species can tell us a lot about an area.

PARS NEEDS VOLUNTEERS

from skilled professional scientists to the most amateur naturalist, to create an army of citizen scientists to help tell us about the status and locations of Pennsylvania's herps. Please visit our website for more info and sign-up to volunteer today.

The Herps need your help!

HOW TO HELP

PARS determine the distribution and status of all amphibians and reptiles throughout Pennsylvania.
